

Once you have successfully completed the return to Professional Practice programme and re registered with the NMC you will be enrolled on to our Preceptorship programme. As a preceptee you will be a key stakeholder in the programme, feeding in to the process with **advice**, **feedback** and **suggestions**. Working collaboratively and evolving the curriculum - we welcome regular evaluation and utilise social media platforms to **share relevant information**, **opportunities** and **celebrate success**.

We are **extremely proud** of our well evaluated Inter-professional Preceptorship programme which meets the Department of Health (2010) recommendations for all newly registered health care professionals. The **flexibility** of the programme will allow you to achieve the outcomes required by your service and also your **own professional** and **personal goals**.

## A quick guide to ... Return to Professional practice

CUH is pleased to offer an NMC validated Return to Practice Nursing Programme for both Adult and Child registration. The course is provided in partnership with Anglia Ruskin University and is for qualified Nurses whose registration with the NMC has lapsed. This is an exciting opportunity for enthusiastic qualified Nurses wishing to return to the nursing profession.

The Return to Professional Practice for Nursing programme will prepare you for return to today's workforce by providing education that is both practice and classroom based. It has been validated by the NMC to enable those Practitioners whose nursing registration has lapsed to return to practice with the contemporary skills, knowledge and competence required in the present healthcare climate.

*Please note, unfortunately this programme is not suitable for nurses registered overseas wishing to gain NMC registration in the UK.*

Together-Safe | Kind | Excellent

We look forward to welcoming you to CUH as a Return to Professional Practice Nurse. This is a **collaborative journey** which we are excited to be joining you on.

## The Clinical Education Support Team

We provide **education, facilitation and development to learners pre and post registration.**

We **support** our return to professional practice nurses as well as providing education and advice on NMC Standards to Support Students Supervision and Assessment to our staff.

The ClinEd team works with staff across the Trust to develop and deliver initiatives that will enhance the patient experience, support and develop individuals and clinical teams, and provide an evidence base for practice. We achieve this by:

- Providing leadership, facilitation, support and development for nursing staff
- Developing evidence based tools for use in practice
- Maintaining a clinical presence
- Working on specific priorities and projects to deliver the Trust strategy
- Working with individuals and interdisciplinary teams to ensure effective outcomes
- Evaluating the service we provide
